EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Cancel claims 7-9.

This application is in condition for allowance except for the presence of claims 7-9 to a species non-elected without traverse. Accordingly, the claims are cancelled since there is no generic claim as stated in the Office Action mailed on 9/24/2003.

The following is an examiner's statement of reasons for allowance:

A variable polarization rotator for rotating a polarization plane of polarized light having a phase plate, a phase difference variable plate, and a phase difference adjustment section is known in the art as discussed in the previous office action. However, none of the prior art fairly teaches or suggests such a variable polarization rotator wherein, inter alia, the phase plate has an optical axis in the same direction as the polarization direction of an input beam, wherein the light beam is made into a linearly polarized light after being transmitted into the phase difference variable element and then into the phase plate, as claimed in the instant application.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
